Safe payment process of C_C4H430_94 training materials, Guaranteed Success in C_C4H430_94 Exam with our APP Dumps, Once you start to practice on our C_C4H430_94 study guide, you will find that learning can be a happy and interesting process.

As you see, all of the three versions of our C_C4H430_94 exam dumps are helpful for you to get the C_C4H430_94 certification, If you buy our products, you can also continue your study when you are in an offline state.

You can adjust the test pattern according to your weakness points and pay attention to the questions you make mistake frequently with the help of C_C4H430_94 valid online test engine.

NEW QUESTION: 1

Which of the following control is used to ensure that users have the rights and permissions they need to perform their jobs, and no more?

- A. System and Communications protection control
- B. Identification and Authentication control
- C. Audit and Accountability control
- D. Access control

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Access control helps an organization implement effective access control. They ensure that users have the rights and permissions they need to perform their jobs, and no more. It includes principles such as least privilege and separation of duties.

Incorrect Answers:

A: System and Communications protection control is a large group of controls that cover many aspects of protecting systems and communication channels. Denial of service protection and boundary protection controls are included. Transmission integrity and confidentiality controls are also included.

B: Audit and Accountability control helps an organization implement an effective audit program. It provides details on how to determine what to audit. It provides details on how to protect the audit logs. It also includes information on using audit logs for non-repudiation.

D: Identification and Authentication control cover different practices to identify and authenticate users.

Each user should be uniquely identified. In other words, each user has one account. This account is only used by one user. Similarly, device identifiers uniquely identify devices on the network.

NEW QUESTION: 2

Company XYZ has two business groups. An HR super user would like to create the jobs in one business group and be able to view them in the Job Definition form (Navigation: Work Structures > Job > Description) in the other business group. The user should also be able to assign the job to an employee in the other business group. How can this be done assuming the HR: Cross Business Group profile option is set to Yes?

A. When creating the job, click the 'Benchmark Job' to make the job available across business groups.

B. Create a Job Group as a Master Job Group so that the jobs created under the Global Job Groups are available across all business groups.

C. Job can be created under the Global Job Group so that the jobs created under the Global Job Groups are available across all business groups.

D. This functionality is not yet provided. Employees can be assigned only to the jobs created under the current business group.

E. A Global Security Profile must be attached to the responsibility to be able to view jobs created in other business groups.

Answer: B

Explanation:

Explanation

In order to map jobs from one job group to another, a master job group must be defined. Master job groups are intermediate groupings only and cannot be used for other functional
