**NEW QUESTION: 3**

The striking consistencies among the folk tales of any region, especially the tale plots of independent origins, like those among a region's languages, are owing to the fact that folklore, like language, is a collective property - a socialized aspect of the culture subject to stricter and more uniform laws than fields in which individual creation prevails. Folk tales do contain certain variable elements - for example, the distribution of points of emphasis and the nomenclature (vocation) and attributes of the dramatic personae - through which the teller's own personality and inclinations may find expression. Also, the teller's choice among the repertory of the available genres (for example, fairy tales and anecdotes) and among the known tales within each genre often reflect the teller's preferred manner of execution, while the teller narrator typically assumes whichever character most closely resembles the teller. Nevertheless, whereas in written literature a creative personality is free to shape entirely new

roles, including that of narrator, in storytelling all characters are predetermined by the tale. Attempts at biographical interpretation almost invariably fail to convince; the tale must come before the teller.

The passage as a whole can appropriately be viewed as

- A. an explanation as to why tellers of folk tales generally choose to conform to cultural expectations in how they tell their tales
- B. an examination of the ways in which story tellers imbue well-known folk tales with their own personalities
- C. an argument that folk tales evolve over time as a result of both cultural shifts and individual creativity
- D. a description of the extent of the consistencies generally observed among a region's folk tales
- E. an investigation into certain parallels between language in general and folk tales in particular

**Answer: D**

Explanation:

In the passage, the author first makes the broad point that a culture's various folk tales are remarkably consistent. The author then acknowledges and describes limited ways in which folk tales legitimately vary according to certain preferences of the teller, but then emphasizes the limited extent of the story teller's discretion. Of the five choices, choice E best sums up these ideas.
