Explanation:

Scenario: A user named User1 reports that email messages are being sent from her mailbox without her consent.

For mailboxes in your organization that you wish to enable audit logging on you can do so using the Set-Mailbox cmdlet.

* The AuditDelegate parameter specifies the operations to log for delegate users. Valid values include:

None Update Move MoveToDeletedItems SoftDelete HardDelete

FolderBind SendAs

SendOnBehalf

* Send As

This permission allows delegates to use the mailbox to send messages. After this permission is assigned to a delegate, any message that the delegate sends from the mailbox will appear to have been sent by the mailbox owner.

Incorrect:

* Send on Behalf

This permission also allows a delegate to use the mailbox to send messages. After this permission is assigned to a delegate, the From address in any message sent by the delegate indicates that the message was sent by the delegate on behalf of the mailbox owner.

* The AuditEnabled parameter specifies whether to enable or disable mailbox audit logging.

If auditing is enabled, actions specified in the AuditAdmin, AuditDelegate, and AuditOwner parameters are logged. Valid values include:

\$true

Mailbox audit logging is enabled.

\$false

Mailbox audit logging is disabled.
