NEW QUESTION: 1
You have an Exchange Server 2013 organization.
You successfully migrate the public folders from a previous version of Exchange Server. You discover that one of the public folder mailboxes almost reached its quota size.
You need to move some of the public folders in the public folder mailbox to another public folder mailbox.
What should you run?
A. New-PublicFolderMigrationRequest
B. Set-MailPublicFolder
C. New-PublicFolderMoveRequest
D. Merge PublicFolderMailbox.ps1
Answer: C
Explanation:
* If the content of a public folder mailbox begins to exceed

your mailbox quotas, you may need to move public folders to a different public folder mailbox. There are a couple ways to do this. To move one or more public folders that don't contain subfolders, you can use the PublicFolderMoveRequest cmdlets.
* Use the New-PublicFolderMoveRequest cmdlet to begin the process of moving public folder contents between public folder mailboxes. Moving public folders only moves the physical contents of the public folder; it doesn't change the logical hierarchy. When the move request is completed, you must run the Remove-PublicFolderMoveRequest cmdlet to remove the request or wait until the time specified in the CompletedRequestAgeLimit parameter has passed. The request must be removed before you can run another move request.

NEW QUESTION: 2

A. Option C
B. Option A
C. Option E
D. Option D
E. Option B
Answer: D

NEW QUESTION: 3
Which process capability can be started using an integration API?
