#### **NEW QUESTION: 1**

You are developing an application that includes a class named Warehouse. The Warehouse class includes a static property named Inventory- The Warehouse class is defined by the following code segment. (Line numbers are included for reference only.)

You have the following requirements:

- Initialize the `_inventory` field to an Inventory instance.
- Initialize the `_inventory` field only once.
- Ensure that the application code acquires a lock only when the

\_inventory object must be instantiated.

You need to meet the requirements.

Which three code segments should you insert in sequence at line 09? (To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.)

Select and Place:

**Answer:**

Explanation:

**NEW QUESTION: 2**

After upgrading an IBM Tivoli Endpoint Manager environment to V8.2, why are console users asked to provide .pvk files for the initial login?

- A. This is an indication that the upgrade failed for the console.
- B. This is done to store the .pvk files in the BFEnterprise database.
- C. This request is made to add additional data to the .pvk file for the user.
- D. This request is to verify the user prior to migrating the user to a local account.

**Answer: D**

**NEW QUESTION: 3**

You are a system administrator for a company that is using Office 365.

You receive a report that a user is having sign in issues with the Outlook 2016 desktop app. You log into the Azure Active Directory (Azure AD) portal and observe the following log data:

You need to determine the issue with the user account.

How should you resolve the issue?

- A. Ask the user to define an alternate email address.
- B. Disable multi-factor authentication (MFA).
- C. Ask the user to enter the correct password.
- D. Ask the user to enter the correct user name.

**Answer: A**

**NEW QUESTION: 4**

The role of the certificate authority (CA) as a third party is to:

- A. provide secured communication and networking services based on certificates.

**B.** act as a trusted intermediary between two communication partners.

**C.** confirm the identity of the entity owning a certificate issued by that CA.

**D.** host a repository of certificates with the corresponding public and secret keys issued by that CA.

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

The primary activity of a CA is to issue certificates. The primary role of the CA is to check the identity of the entity owning a certificate and to confirm the integrity of any certificate it issued. Providing a communication infrastructure is not a CA activity. The secret keys belonging to the certificates would not be archived at the CA. The CA can contribute to authenticating the communicating partners to each other, but the CA is not involved in the communication stream itself.
