Our 33160X valid exam topics can fully realize your dreams.

**NEW QUESTION: 1**

A desktop computer runs Windows 8. The computer is joined to an Active Directory Domain Services (AD DS) domain named contoso.com.

You have two domain user accounts: A primary account named User1 that does not have domain administrative privileges. An account named Admin1 that has administrative privileges in the domain.

You are currently logged in as User1. You need to run an application named appl.exe.

You have the following requirements: Start the application by using your administrative credentials.

Ensure that the user environment is fully available to the application.

You need to complete the command to meet the requirements.

Which command segments should you use to complete the command? (To answer, drag the appropriate command segments to the correct locations in the answer area.)

Command segments may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)  
Select and Place:

**Answer:**

Explanation:

Section: Monitor and Maintain Windows Clients (13%) Explanation
