**NEW QUESTION: 1**

Ein Geschäftsbereich kann aufgrund von Größenbeschränkungen die gewünschte Aufgabentrennung zwischen Betrieb und Programmierung nicht erreichen. Welche der folgenden Aussagen ist für den IS-Prüfer am wichtigsten, um \* zu identifizieren?

- A. Zusätzliche Kontrollschwächen
- B. Kompensationskontrollen
- C. Nicht autorisierte Benutzersteuerelemente
- D. Kontrolle über die betriebliche Wirksamkeit

**Answer: B**

## **NEW QUESTION: 2**

You need to recommend a solution to resolve the issue for the London office users.

What should you do?

- A. Modify the properties of the default offline address book (OAB).
- B. Create a new address book policy.
- C. Modify the properties of the OAB virtual directory.
- D. Create a new arbitration mailbox.

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

Exchange Server 2013 CAS role proxies the OAB download request to a "nearest" mailbox server hosting an active Organization Mailbox.

Both London and New York host a mailbox server and a client access server.

Therefore, you need to create a new active Organization Mailbox. Administrators can create additional Organization Mailboxes for fault tolerance or for serving users in a geographically dispersed Exchange deployment.

The Organization Mailbox

The Organization Mailbox is a new type of arbitration mailbox introduced with Exchange 2013.

The arbitration mailbox with persisted capability

OrganizationCapabilityOABGen is referred to as Organization Mailbox. It plays a crucial role in OAB generation, storage and distribution.

Each Exchange Server 2013 mailbox role hosting an Organization Mailbox will generate all Exchange

2013 OAB's defined in the environment. The OAB is generated in the Organization Mailbox first and later copied to the disk.

Testlet 1

Overview

Trey Research is a pharmaceutical company that has 10,000 users. Most of the users work remotely, including the users in the finance department. The finance department users reside in an organizational unit (OU) named Finance.

Trey Research purchases a partner pharmaceutical company named Fabrikam, Inc. Fabrikam has 2,000 users and hosts its own

Exchange Server 2010 organization.

Existing Environment

Active Directory Environment

The network of Trey Research contains an Active Directory forest. The forest contains an empty parent domain named treyresearch.com and a child domain named main.treyresearch.com. The forest contains one site named DefaultSite.

The Trey Research network and the Fabrikam network connect to each other by using a WAN link. A two-way trust exists between the Trey Research and Fabrikam networks.

Trey Research Exchange Server Organization

Trey Research has an Exchange Server 2013 organization that contains four servers. The servers are configured as shown in the following table.

EX1 and EX2 are the members of a database availability group (DAG) named DAG1.

Trey Research has three databases named DB1, DB2, and DB3. DB1 and DB2 replicate between all of the servers in DAG1. DB3 is mounted on EX4.

The storage on EX1 and EX2 is configured as shown in the following table.

The Exchange Server 2013 servers at Trey Research are configured as follows:

EX3 and EX4 perform spam filtering.

The public folder hierarchy mailbox is homed on DB3.

Each mailbox database contains a public folder mailbox.

HTTP traffic is load balanced by using a Layer 4 hardware load balancer.

The hardware load balancer uses the OWA virtual directory for health monitoring.

On EX1 and EX2, the mailbox database files and log files are stored on volume mount points.

IMAP is enabled on EX4 to download email messages for a custom help desk application.

Remote users access their mailbox by using Outlook Web App and Exchange ActiveSync.

The custom help desk application uses a service account that has a display name of Help Desk and an

SMTP address of [\[email#160;protected\]](#)

Fabrikam Exchange Server Organization

Fabrikam has an Exchange Server 2010 organization that contains

two servers. The servers are configured as shown in the following table.

Fabrikam plans to implement the address rewrite feature to change the SMTP domain name of all outbound email to use the treyresearch.com SMTP suffix.

#### Problem Statements

Trey Research identifies the following issues:

Recently on EX2, Volume1 failed for three days. Once the volume was repaired, reseeding the

database from EX1 took more than six hours.

You recently discovered that when the MSEExchangeOWAAppPool application pool on EX3 was in a

stopped state, the hardware load balancer marked EX3 as offline.

Users report that during the installation of updates on the Exchange Server 2013 servers, the users lost

access to their mailbox and were unable to modify public folders.

Several finance department users store sensitive data on their mobile device. The legal department

requires that Exchange ActiveSync be disabled for all of the finance department users.

An Active Directory administrator reports that the domain controllers in the treyresearch.com domain

are overused. The administrator requests that the Exchange Server 2013 servers only use the domain controllers in the main.treyresearch.com domain.

#### Requirements

##### Business Goal

The legal department requires that the finance department users have a segmented view of the global address list (GAL) that only shows recipients in the finance department

Planned Changes  
Trey Research plans to implement the following spam confidence level (SCL) configurations:

Block email messages when the SCL score is 9.

Move the email messages to the postmaster mailbox when the SCL score is 7.

Block email messages and send a non-delivery report (NDR) when the SCL score is 8.

##### Resource Utilization Requirements

Users report that their connection to Outlook Web App is slow since the deployment of IMAP on EX4. The users do not report that they experience performance issues when they use their mobile device.

Trey Research reports that the IMAP service is not business critical and must not have a higher priority over hardware resources than Outlook Web App. On EX4, Outlook Web App has the same priority over hardware resources as Exchange ActiveSync.

**NEW QUESTION: 3**

You are the buyer of protection in a credit default swap. All other things being equal your counterparty credit risk is increasing if:

- A. the recovery rate is increasing
- B. the credit spread is decreasing
- C. the credit spread is decreasing and recovery rate is increasing
- D. the credit spread is increasing

**Answer: D**

**NEW QUESTION: 4**

Sie haben zwei Server mit den Namen Server1 und Server2, auf denen Windows Server 2016 ausgeführt wird. Auf beiden Servern ist die DHCP-Serverrolle installiert.

Server1 verfährt über einen DHCP-Bereich mit dem Namen Scope1. Server2 verfährt über einen DHCP-Bereich mit dem Namen Scope2. Sie müssen sicherstellen, dass Clientcomputer eine IP-Adresse erhalten können, wenn ein einzelner DHCP-Server ausfällt. Sie müssen in der Lage sein, den Prozentsatz der Anforderungen zu steuern, auf die jeder DHCP-Server während des normalen Netzwerkbetriebs antwortet.

Was tun?

- A. Fügen Sie Server1 und Server2 als Knoten in einem Failovercluster hinzu und konfigurieren Sie dann die Portregeln für UDP 67 und UDP 68.
- B. Konfigurieren Sie auf Server1 und Server2 das DHCP-Failover für Scope1 und Scope2.
- C. Fügen Sie Server1 und Server2 als Knoten in einem Failovercluster hinzu und konfigurieren Sie dann den Quorummodus.
- D. Fügen Sie Server1 und Server2 als Knoten in einem Failovercluster hinzu und konfigurieren Sie dann die DHCP-Server-Serverfunktion.

**Answer: B**

Explanation:

Only DHCP Failover technology provides you the ability to control the load-balancing percentage of address leases in a scope for each server. "You must be able to control the percentage of requests to which each DHCP server responds during normal network operations."
