NEW QUESTION: 1

Which statement completes the following sentence about SOA requirements? SOA requirements differ from traditional project requirements because SOA requirements...

- A.** Are focused on defining the integration points between applications,
- B.** Once handed to a project by the business, can be purely managed by that project.
- C.** Are realized by shared Services which are not owned by any single application, consist of their own lifecycle, and are

managed independently.

D. Should only be managed by a SOA centre of excellence.

E. May be implemented by existing applications, applications that are being developed, or proposed applications that have not yet been delivered.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

In order to achieve effective SOA, applications simply cannot be developed independently of one another.

Further, SOA applications utilize shared Services which are not owned by any single application, consist of their own lifecycle and are managed independently. In order to be effective in managing requirements within an SOA, applications have to be aware of the requirements of existing applications, in-flight applications, as well as proposed applications.
