So we should equip us with useful knowledge and keep the information updating all the time to catch up with the pace of the times, We will provide you with professional advice before you buy our 5V0-36.22 guide materials.

Aside from industry recognition, being a certified 5V0-36.22 can bring life-changing benefits to your career and personal life.

NEW QUESTION: 1

You have an Azure SQL database named DB1.
You plan to create the following four tables in DB1 by using
the following code.

You need to identify which table must be created last.
What should you identify? To answer, select the appropriate
options in the answer area.
NOTE: Each correct selection is worth one point.
A. Table4
B. Table1
C. Table2
D. Table3
Answer: C
Explanation:
Explanation
Table1 references Table4. Therefore Table4 must be created
before Table1.
Table2 references Table1 and Table3. Therefore Table1 and
Table3 must be created before Table2.
Note: FOREIGN KEY REFERENCES is a constraint that provides
referential integrity for the data in the column or columns.
FOREIGN KEY constraints require that each value in the column
exists in the corresponding referenced column or columns in the
referenced table. FOREIGN KEY constraints can reference only
columns that are PRIMARY KEY or UNIQUE constraints in the
referenced table or columns referenced in a UNIQUE INDEX on the
referenced table.
