NEW QUESTION: 2

An Incident Responder is going to run an indicators of compromise (IOC) search on the endpoints and wants to use operators in the expression.

Which tokens accept one or more of the available operators when building an expression?

- A. Domainname, Filename, and Filehash
- B. Domainname and Filename only
- C. Filename, Filehash, and Registry
- D. All tokens

Answer: C

NEW QUESTION: 3

Refer to the exhibit.

A network has been planned as shown. Which three statements accurately describe the areas and devices in the network plan? (Choose three.)

- A. Network Device B is a hub.
- B. Network Device A is a switch.
- C. Area 2 contains a Layer 2 device.
- D. Network Device A is a hub.
- E. Network Device B is a switch.
- F. Area 1 contains a Layer 2 device.

Answer: A,B,F

Explanation:

Switches use a separate collision domain for each port, so device A must be a switch. Hubs, however, place all ports in the same collision domain so device B is a hub. Switches reside in layer 2 while hubs are layer 1 devices.

NEW QUESTION: 4

You are designing a Windows Presentation Foundation (WPF) application that accesses a Microsoft SQL Server 2008 database. You must ensure that database administrators can change the structure of database tables without requiring redeployment of the WPF application.

You need to recommend a data modeling and data access strategy. What should you recommend?.

- A. Model the data layer by using typed DataSet objects with automatically generated Create, Read, Update, and Delete (CRUD) statements
- B. Model the data layer by using DataSet objects with automatically generated Create, Read, Update, and Delete (CRUD) statements.

C. Model the data layer by using custom data access objects. Access the database by using stored procedures.

D. Model the data layer by using LINQ to SQL with attribute-based mapping of objects to tables.

Answer: C

Explanation:

If you don't change the output of the stored procedures, you don't need to recompile the application, because the change in schema are managed inside the stored procedure.
