NEW QUESTION: 1
You are developing an HTML5 web application that displays the current temperature whenever a button is clicked.
The following code provides this functionality.

When the temperature is loaded, the status property on the loader instance does not change.
You need to ensure that the status property on the loader instance is updated when the temperature is loaded.
Which code segment should you use to replace the Loader function?

A. Option B
B. Option A

C. Option C
D. Option D
Answer: B
Explanation:
Incorrect:
not D: window.status property
The status property sets the text in the status bar at the
bottom of the browser, or returns the previously set text.

NEW QUESTION: 2
When using an IaaS solution, what is the capability provided to
the customer?
A. To provision processing, storage, networks, and other
fundamental computing resources when the provider is able to
deploy and run arbitrary software, which can include OSs and
applications.
B. To provision processing, storage, networks, and other
fundamental computing resources when the consumer is not able
to deploy and run arbitrary software, which can include OSs and
applications.
C. To provision processing, storage, networks, and other
fundamental computing resources when the auditor is able to
deploy and run arbitrary software, which can include OSs and
applications.
D. To provision processing, storage, networks, and other
fundamental computing resources when the consumer is able to
deploy and run arbitrary software, which can include OSs and
applications.
Answer: D
Explanation:
Explanation/Reference:
Explanation:
According to "The NIST Definition of Cloud Computing," in IaaS,
"the capability provided to the consumer is to provision
processing, storage, networks, and other fundamental computing
resources where the consumer is able to deploy and run
arbitrary software, which can include operating systems and
applications. The consumer does not manage or control the
underlying cloud infrastructure but has control over operating
systems, storage, and deployed applications; and possibly
limited control of select networking components (e.g., host
firewalls).

NEW QUESTION: 3
