You can dick and see the forms of the answers and the titles and the contents of our HPE6-A78 guide torrent, More importantly, we will promptly update our HPE6-A78 exam materials based on the changes of the times and then send it to you timely.

Finally, Samrock's latest HP HPE6-A78 simulation test, exercise questions and answers have come out, The answers are accurate and correct for your preparation.

The aim of our HPE6-A78 PDF study guide with test king is to help users pass their test smoothly and effectively, so all our products are fully guaranteed.

#### **NEW QUESTION: 1**

Which two statements about multicast routing are true? (choose two)

**A.** Multicast routes are used to directly forward traffic without making RPF checks

- B. You can define RPF routes for multicast on border routers to enable reverse path forwarding to an external network
- C. RPF routes for multicast can be distributed
- D. You can define RPF routes for multicast when you want multicast data to diverge from the unicast traffic path
- E. IPv6 static multicast routes are supported

**Answer: B,D**

## **NEW QUESTION: 2**

SIMULATION

### **Answer:**

Explanation:

Review the explanation part for full solution

Explanation/Reference:

Explanation:

We need to define the parameter map, specifying port 8080 for http and https and define the servers and the license:

```
Branch-ISR#config t
```

```
Branch-ISR(config)# parameter-map type content-scan global
```

```
Branch-ISR(config-profile)#server scansafe primary name
```

```
proxy-a.scansafe.net port http 8080 https 8080
```

```
Branch-ISR(config-profile)#server scansafe secondary name
```

```
proxy-b.scansafe.net port http 8080 https
```

```
8080
```

```
Branch-ISR(config-profile)#license 0 0123456789abcdef
```

If the CWS proxy servers are not available, we traffic should be denied. This is done by the following configuration:

```
Branch-ISR(config-profile)#server scansafe on-failure block-all
```

Now we need to apply this to the fastethernet 0/1 interface outbound:

```
Branch-ISR(config)#interface Fastethernet 0/1
```

```
Branch-ISR(config-if)#content-scan outbound
```

```
Branch-ISR(config-if)#exit
```

```
Branch-ISR(config)#exit
```

Finally, we can verify our configuration by using the "show content-scan summary" command:

```
Branch-ISR#show content-scan summary
```

```
Primary: 72.37.244.203(Up)*
```

```
Secondary: 70.39.231.99 (Up)
```

```
Interfaces: Fastethernet0/1
```

## **NEW QUESTION: 3**

Your company is building a new web application.

You plan to collect feedback from pilot users on the features being delivered.

All the pilot users have a corporate computer that has Google

Chrome and the Microsoft Test & Feedback extension installed. The pilot users will test the application by using Chrome.

You need to identify which access levels are required to ensure that developers can request and gather feedback from the pilot users. The solution must use the principle of least privilege. Which access levels in Azure DevOps should you identify? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Basic

Assign Basic to users with a TFS CAL, with a Visual Studio Professional subscription, and to users for whom you are paying for Azure Boards & Repos in an organization.

Box 2: Stakeholder

Assign Stakeholders to users with no license or subscriptions who need access to a limited set of features.

Note:

You assign users or groups of users to one of the following access levels:

Basic: provides access to most features

VS Enterprise: provides access to premium features

Stakeholders: provides partial access, can be assigned to unlimited users for free
