NEW QUESTION: 1

A new service request asks for all members of the finance department to have access to the accounting department's file server VMs on the private cloud environment.

Which of the following is the MOST efficient way to fulfill this service request?

A. Implement a single sign-on and two-factor authentication solution using a soft token.

- B.** Set up duplicate file server VMs that the finance department has access to and enable two-way replication.
- C.** Create a new group for the finance department that will allow access to the accounting department's file server VMs.
- D.** Add all users of the finance department to the accounting departments file server VMs access lists.

Answer: B

NEW QUESTION: 2

When does double breasting occur?

- A.** An employer has two companies that are substantially identical.
- B.** An employer has two businesses, one union and one nonunion, that do substantially the same work but have different management, equipment, and customers.
- C.** A neutral employer performs work that is normally done by striking employees.
- D.** Two businesses perform operations that are part of the same product.

Answer: B

Explanation:

Explanation/Reference:

Answer option D is correct.

Double breasting occurs when an employer has two companies that are separate and distinct from each other but do the same type of work, and one company is union while the other is nonunion. This occurs most often in the construction industry when contractors have two different crews for bidding on union and nonunion jobs. An alter ego employer has two substantially identical businesses (B). The ally doctrine describes work that is done by a neutral employer while another business is shut down by a strike (A). A straight-line operation is one in which two businesses perform operations that complement each other's operations (C). If one business is struck, the other may be as well because they are engaged in a single economic enterprise.
