NEW QUESTION: 3
You manage an application running on Azure Web Sites Standard tier. The application uses a substantial amount of large image files and is used by people around the world. Users from Europe report that the load time of the site is slow.
You need to implement a solution by using Azure services. Which two actions will achieve the goal? Each correct answer presents a complete solution.
A. Configure Azure Web Site auto-scaling to increase instances at high load.
B. Configure Azure blob storage with a custom domain.
C. Configure Azure CDN to cache all responses from the application web endpoint.
D. Configure Azure CDN to cache site images and content stored in Azure blob storage.
Answer: B,D
Explanation:
You can configure a custom domain for accessing blob data in your Azure storage account.
You can map a custom domain to a CDN endpoint in order to use your own domain name in URLs to cached content rather than using a subdomain of azureedge.net.
