If you purchase our H13-531\_V2.0 test torrent, you always download the latest version free of charge before your test, Besides, the questions which you have made mistake can be marked for next review.

If you got any questions we will **Vce H13-531\_V2.0 Files** send the necessary response within the shortest possible time.

**NEW QUESTION: 1**

Which type of firewall can act on the behalf of the end device?

- A. Application
- B. Packet
- C. Proxy
- D. Stateful packet

**Answer: C**

Explanation:

Application firewalls, as indicated by the name, work at Layer 7, or the application layer of the OSI model.

These devices act on behalf of a client (aka proxy) for requested services.

Because application/proxy firewalls act on behalf of a client, they provide an additional

"buffer" from port scans, application attacks, and so on. For example, if an attacker found a vulnerability in an application, the attacker would have to compromise the application/proxy firewall before attacking devices behind the firewall. The application/proxy firewall can also be patched quickly in the event that a vulnerability is discovered. The same may not hold true for patching all the internal devices.

#### **NEW QUESTION: 2**

Which aspect of cloud computing makes it very difficult to perform repeat audits over time to track changes and compliance?

- A. Resource pooling
- B. Multitenancy
- C. Dynamic optimization
- D. Virtualization

**Answer: D**

Explanation:

Cloud environments will regularly change virtual machines as patching and versions are changed.

Unlike a physical environment, there is little continuity from one period of time to another. It is very unlikely that the same virtual machines would be in use during a repeat audit.

#### **NEW QUESTION: 3**

Refer to the exhibit. When utilizing the Cisco Application Virtual Switch in an ACI fabric, it can be deployed in two types of switching modes. Which two types of encapsulations can be used in each mode? (Choose two.)

- A. No local Switching: VXLAN
- B. No Local Switching: VLAN or VXLAN
- C. Local Switching: VLAN

D. Local Switching: VLAN or VXLAN

E. NoLocal Switching: VLAN

F. Local Switching: VXLAN

**Answer: A,D**

Explanation:

Explanation:

**NEW QUESTION: 4**

You are working as a Security Analyst in a company XYZ that owns the whole subnet range of 23.0.0.0/8 and 192.168.0.0/8.

While monitoring the data, you find a high number of outbound connections. You see that IP's owned by XYZ (Internal) and private IP's are communicating to a Single Public IP.

Therefore, the Internal IP's are sending data to the Public IP. After further analysis, you find out that this Public IP is a blacklisted IP, and the internal communicating devices are compromised.

What kind of attack does the above scenario depict?

A. Advanced Persistent Threats

B. Spear Phishing Attack

C. Botnet Attack

D. Rootkit Attack

**Answer: C**
