**NEW QUESTION: 1**

What is the maximum thin device size that can be created on a VMAX3 array?

- A. 240 GB
- B. 64 TB
- C. 60 TB
- D. 16 TB

**Answer: B**

**NEW QUESTION: 2**

You are designing an AI workflow that will aggregate data stored in Azure as JSON documents. You expect to store more than 2 TB of new data daily.

You need to choose the data storage service for the data. The solution must minimize costs. Which data storage service should you choose?

- A. Azure Blob storage
- B. Azure File Storage

C. Azure Data Lake Storage

D. Azure Manage Disks

**Answer: A**

Explanation:

Generally, Data Lake will be a bit more expensive although they are in close range of each other. Blob storage has more options for pricing depending upon things like how frequently you need to access your data (cold vs hot storage). Data Lake is priced on volume, so it will go up as you reach certain tiers of volume.
