The board of directors of an enterprise has approved a three-year IT strategic program to centralize the core business processes of its global entities into one core system. Which of the following should be the CIO's NEXT step?

- A. Require the development of a program roadmap.
- B. Engage a team to perform a business impact analysis (BIA).
- C. Require the development of a risk management plan.
- D. Determine resource requirements for program implementation.

Answer: A

NEW QUESTION: 2

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: D

NEW QUESTION: 3

You work as a Project Manager for Company Inc. You have to conduct the risk management activities for a project. Which of the following inputs will you use in the plan risk management process?

Each correct answer represents a complete solution. Choose all that apply.

A. Explanation:

The inputs to the plan risk management process are as follows:
Project scope statement: It provides a clear sense of the range of possibilities associated with the project and establishes the framework for how significant the risk management effort may become.

Cost management plan: It describes how risk budgets, contingencies, and management reserves will be reported and accessed.

Schedule management plan: It describes how the schedule contingencies will be reported and assessed.

Communication management plan: It describes the interactions, which occurs on the project and determines who will be available to share information on various risks and responses at different times.

Enterprise environmental factors: It include, but are not limited to, risk attitudes and tolerances that describe the degree of risk that an organization withstand.

Organizational process assets: It includes, but are not limited to, risk categories, risk statement formats, standard templates, roles and responsibilities,

authority levels for decision-making, lessons learned, and stakeholder registers.

- B. Schedule management plan
- C. Project scope statement
- D. Cost management plan
- E. Quality management plan

Answer: A,B,C,D

Explanation:

is incorrect. It is not an input for Plan risk management process.

NEW QUESTION: 4

Which of the following protocol can be considered as 'application' layer protocol in ISO/OSI 7 layer model?

- A. SMTP
- B. UDP
- C. IP
- D. TCP

Answer: A
