Samrock Offers Latest CII IF1 Exam Questions.

NEW QUESTION: 1

Which two options are benefits of EIGRP OTP? (Choose two.)

- A. It allows the administrator to use different autonomous system numbers per EIGRP domain.
- B. It allows EIGRP neighbors to be discovered dynamically.
- C. It requires only minimal support from the service provider.
- D. It allows EIGRP routers to peer across a service provider without the service provider involvement.
- E. It fully supports multicast traffic.
- F. It allows the customer EIGRP domain to remain contiguous.

Answer: D,F

Explanation:

EIGRP Over the Top (OTP) allows EIGRP routers to peer across a service provider infrastructure without the SP's involvement. In fact with OTP, the provider won't see customer routes at all. EIGRP OTP acts as a provider-independent overlay that transports customer data between the customer's routers.

To the customer, the EIGRP domain is contiguous. A customer's EIGRP router sits at the edge of the provider cloud, and peers with another EIGRP router a different location across the cloud. Learned routes feature a next hop of the customer router - not the provider. Good news for service providers is that customers can deploy EIGRP OTP with

their involvement

NEW QUESTION: 2

After filtering a fw monitor trace by port and IP, a packet is displayed three times; in the i, I, and o inspection points, but not in the O inspection point.

Which is the likely source of the issue?

- A. The packet has been sent out through a VPN tunnel unencrypted.
- B. It is due to NAT.
- C. An IPSO ACL has blocked the packet's outbound passage.
- D. A SmartDefense module has blocked the packet.

Answer: B

NEW QUESTION: 3

When configuring a static route on a broadcast interface , you must specify the next -hop IP address.

- A. FALSE
- B. TRUE

Answer: B
