NEW QUESTION: 1

Exhibit.

You are configuring an SRX chassis cluster with the node-specific hostname and management address. Referring to the exhibit, which configuration completes this requirement?

A)

B)

C)

D)

A. Option D

B. Option B

C. Option A

D. Option C

Answer: A

NEW QUESTION: 2

In 1949, a study of heart disease included 5,137 adults: 2,292 men and 2,845 women. All the individuals were 49 to 70 years of age, and none showed any signs of coronary artery disease.

After 14-16 years of careful follow-up, it was found that:

I. 151 men and 37 women showed evidence of coronary artery disease that would account for a heart attack.

II. 102 men and 18 women died of coronary artery disease before they reached the age of 65.

III. 58 percent of the men and 39 percent of the women died within one hour of having a heart attack.

IV. For both men and women, sudden death was more likely if they were under age 55 at the time of the attack.

V. Not all heart attacks produce symptoms. A considerable number of men and women had a myocardial infarction (heart muscle damage) without knowing it. Of those who suffered such "silent coronaries"; 22 percent of the men and 35 percent of the women did not know muscle damage had occurred.

A group of 1000 men and 1200 women between the ages of 50 and 65 are to be studied for coronary artery disease.

Based on the original study, which of the following results could be predicted most reliably?

A. Eight (8) women will die of coronary heart disease after they reach age 65.

B. Sixteen (16) women will show significant evidence of coronary artery disease.

C. Forty-four (44) men will die of coronary artery disease after they reach age 65.

D. Sixty-five (65) men will show no significant evidence of coronary artery disease.

Answer: B
