**NEW QUESTION: 1**

Your network contains a single Active Directory domain. Active Directory Rights Management Services (AD RMS) is deployed on the network.

A user named User1 is a member of only the AD RMS Enterprise Administrators group. You need to ensure that User1 can change the service connection point (SCP) for the AD RMS installation. The solution must minimize the administrative rights of User1. To which group should you add User1?

- A. AD RMS Auditors
- B. Domain Admins
- C. Schema Admins
- D. AD RMS Service Group

**Answer: B**

**Explanation:**

The AD RMS SCP can be registered automatically during AD RMS installation, or it can be registered after installation has completed. To register the SCP you must be a member of the local AD RMS Enterprise Administrators group and the Active Directory Domain Services (AD DS) Enterprise Admins group, or you must have been given the appropriate authority. If the user account installing AD RMS does not have permission to register the SCP you will see an Event ID: 190 in the Event Viewer . You can manually register the SCP in the AD RMS console. Open SCP tab in the cluster's Properties box and select the Change SCP check box.

**NEW QUESTION: 2**

Which of the following statements could be true about a server overheating? (Select TWO).

- A. The processors are of two different stepping levels.
- B. The server is having memory errors.
- C. The server fans have failed.
- D. The processor is hitting 100% utilization.
- E. There is no thermal protection between the processor and the heat sink.

**Answer: C,E**

**NEW QUESTION: 3**

What is the unit of measurement of the average rate of a token bucket?

- A. bytes per second
- B. kilobits per second
- C. kilobytes per second
- D. bits per second

**Answer: D**

**Explanation:**

A token bucket is a formal definition of a rate of transfer. It has three components: a burst size, a mean rate, and a time interval (Tc). Although the mean rate is generally represented as bits per second, any two values may be derived from the third by the relation shown as follows:

mean rate = burst size / time interval
