**NEW QUESTION: 1**

OceanStor series fan module is stored under a fault condition, the other fan module will automatically increase speed to ensure the system under a single temperature-controlled fan module, then it needs to be replaced a failed fan.

- A. False
- B. True

**Answer: B**

**NEW QUESTION: 2**

You have a Microsoft SharePoint Online subscription. The subscription has a modern site collection named Corporate that contains company data and a modern site collection named App Catalog for managing third-party apps.

You have the following requirements for the installation and customization of apps:

Users in an Active Directory group named Group1 must be able to approve the installation of SharePoint apps in the Corporate site collection  
Users in an Active Directory group named Group2 must be able to change the stylesheet of the sites in the Corporate site collection  
You need to configure the site collection permissions to meet the requirements. The solution must use the principle of least privilege.

To which SharePoint group should you add Group1 and Group2? To answer, drag the appropriate SharePoint groups to the correct groups. Each SharePoint group may be used once, more than once, or not at all. You may need to drag the split bat between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer :**

Explanation:

Explanation:

**NEW QUESTION: 3**

Azure Machine Learning

Studio. The correct answer is: Hyperparameters and Tune Model.

Hyperparameters and Tune Model. The correct answer is: Hyperparameters and Tune Model.

Hyperparameters and Tune Model. The correct answer is: Hyperparameters and Tune Model.

Hyperparameters and Tune Model. The correct answer is: Hyperparameters and Tune Model.

- A. Hidden layer specification
- B. Learning Rate
- C. The type of the normalizer
- D. Number of learning iterations
- E. Number of hidden nodes

**Answer: A,D**

Explanation:

D: For Number of learning iterations, specify the maximum number of times the algorithm should process the training cases.

E: For Hidden layer specification, select the type of network architecture to create.

Between the input and output layers you can insert multiple hidden layers. Most predictive tasks can be accomplished easily with only one or a few hidden layers.
