**Answer: A,E**

### NEW QUESTION: 3

A technician named Tech1 is assigned the task of joining the laptops to the domain. The computer accounts of each laptop must be in an organizational unit (OU) that is associated to the department of the user who will use that laptop. The laptop names must start with four characters indicating the department followed by a four-digit number. Tech1 is a member of the Domain Users group only. Tech1 has the administrator logon credentials for all the laptops.

You need Tech1 to join the laptops to the domain. The solution must ensure that the laptops are named correctly, and that the computer accounts of the laptops are in the correct OUs.

Solution: You script the creation of files for an offline domain join, and then you give the files to Tech1.

You instruct Tech1 to sign in to each laptop, and then to run djoin.exe.

Does this meet the goal?

A. Yes

B. No

**Answer: A**
