Although we try our best to keep up with them, there is always **Reliable OMG-OCEB2-FUND100 Test Testking** a lag of the time when we could know the vendors are updating the questions and we manage to get the new questions.

All above, our OMG-OCEB2-FUND100 exam braindumps have satisfied more 70,000+ esteemed customers, Using Samrock you can pass the

Option D is invalid because the VPC endpoint is used for VPCs. For more information on Lambda function Permission model, please visit the URL <https://docs.aws.amazon.com/lambda/latest/dg/intro-permission-model.html>. The correct answer is: Use an IAM role which has permissions to the DynamoDB table and attach it to the Lambda function. Submit your Feedback/Queries to our Experts

NEW QUESTION: 2

- A. Option C
- B. Option A
- C. Option D
- D. Option B
- E. Option F
- F. Option E

Answer: A,F

Explanation:

One possibility is that no SQL Server Agent alerts have been configured. This is a free, easy way to get notified of corruption, job failures, or major outages even before monitoring systems pick it up.

NEW QUESTION: 3

You manage an ASP.NET Core E-Commerce application that is deployed to Azure App Service. You plan to use Application Insights for collecting telemetry data. You must prepare a report that describes utilization patterns of uses. The report must include the following information:

- * the Country or Region from which users access the application
- * how often and for how long users browse the catalog
- * how many Canadian customers visited the offers page
- * how much time Premium customers spend on the support page
- * the percentage of users that added items to a shopping cart and completed purchases

You need to collect the required data. Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer :

Explanation:

Explanation

Box 1 Geography: Users
"the Country or Region from which users access the application"

The Users panel allows you to understand important details about your users in a variety of ways. You can use this panel to understand such information as where your users are connecting from, details of their client, and what areas of your application they're accessing.

Box 2: Feature usage: Session

" how often and for how long users browse the catalog"

The Sessions panel is similar to the Users panel. Where Users helps you understand details about the users accessing your application, Sessions helps you understand how those users used your application.

Box 3 Canada Offers: Cohorts

" how many Canadian customers visited the offers page"

A Cohort is a set of users grouped on similar characteristics. You can use cohorts to filter data in other panels allowing you to analyze particular groups of users. For example, you might want to analyze only users who completed a purchase, or users from Canada.

Box 4 Premium support: Cohorts

"how much time Premium customers spend on the support page"

A Cohort is a set of users grouped on similar characteristics. You can use cohorts to filter data in other panels allowing you to analyze particular groups of users. For example, you might want to analyze only users who completed a purchase, or users from Canada.

Box 5: Buyer behavior: Funnels

"the percentage of users that added items to a shopping cart and completed purchases" Funnels focus on what you want users to do. A funnel represents a set of steps in your application and the percentage of users who move between steps. For example, you could create a funnel that measures the percentage of users who connect to your application who search product. You can then see the percentage of users who add that product to a shopping cart, and then the percentage of those who complete a purchase.

NEW QUESTION: 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 for Finance and Operations security administrator.

When testing security setups, users report that certain roles are gaining access to sensitive information via a form in the system.

You must investigate which user roles have what visibility and

access level to system objects, and then send a report to the implementation team to address security compliance concerns. You need to report the information from the system.
Solution: Generate the Security duty assignments report.
Does the solution meet the goal?

A. Yes

B. No

Answer: B
