NEW QUESTION: 1

What language interface would a database administrator use to establish the structure of database tables?

- A. Data query language.
- B. Data control language.
- C. Data manipulation language.
- D. Data definition language.

Answer: D

Explanation:

The schema is a description of the overall logical structure of the database using data definition language (DDL), which is the connection between the logical and physical structure of the database. DDL is used to define, or determine, the database.
