Now the CS0-002 Exam Bootcamp exam dumps provided by Samrock have been recognized by masses of customers, but we will not stop the service after you buy, Our CompTIA experts deem it impossible to drop the CS0-002 exam, if you believe that you have learnt the contents of our CS0-002 study guide and have revised your learning through the CS0-002 practice tests.

NEW QUESTION: 1

Documented standards/procedures for the use of cryptography across the enterprise should PRIMARILY:

- A. define the circumstances where cryptography should be used.
- B. establish the use of cryptographic solutions.
- C. define cryp, Graphic algorithms and key lengths.
- D. describe handling procedures of cryptographic keys.

Answer: A

Explanation:

There should be documented standards- procedures for the use of cryptography across the enterprise; they should define the circumstances where cryptography should be used. They should cover the selection of cryptographic algorithms and key lengths, but not define them precisely, and they should address the handling of cryptographic keys. However, this is secondary to how and when cryptography should be used. The use of

cryptographic solutions should be addressed but, again, this is a secondary consideration.

NEW QUESTION: 2

Which Navisphere user type restricts you from creating additional user accounts but allows LUNs to be bound?

- A. Root
- B. Manager
- C. Administrator
- D. Operator
- E. Monitor

Answer: B

NEW QUESTION: 3

You have an Active Director domain named Contoso.com. The domain contains servers named Server 1,

Server2 and Server3 that run Windows Server 2016

Server1 and Server2 are nodes in a Hyper V cluster named Cluster1. You add a Hyper V Replica Broker role named Broker 1 to Cluster 1

Server3 is a Hyper-V server. A virtual machine named VM1 runs on Server3.

Live Migration is enabled on all three servers and it is configured to use Kerberos authentication only.

You need to ensure that you can perform the migration of VM1 to Server2

What should you do?

- A. Modify the Delegation settings for the Server3 computer account.
- B. Modify the Cluster Permissions for Cluster1.
- C. Modify the Storage Migration settings on Server3
- D. Add the Server3 computer account to the Replicator group on Server1 and Server2.

Answer: A

Explanation:
