NEW QUESTION: 2

The ability of an employee to use multiple skill sets on the job represents which of the following job-enrichment activities?

- A. Task identity
- B. Task variety

- C. Skill variety
- D. Job rotation

Answer: C

Explanation:

Answer option B is correct. Skill variety is one of many job-enrichment activities introduced by J.R. Hackman. Enriching the work of employees can lead to greater job satisfaction and retention. Task variety (D), task identity (C) and job rotation (A) are other job enrichment activities that allow employees to vary their job tasks, identify the whole of the work produced, and be cross-trained in multiple functions. See Chapter 5 for more information. Chapter: Human Resource Development
Objective: Talent Management

NEW QUESTION: 3

Online banking transactions are being posted to the database when processing suddenly comes to a halt. The integrity of the transaction processing is BEST ensured by:

- A. validation checks.
- B. database integrity checks.
- C. input controls.
- D. database commits and rollbacks.

Answer: D

Explanation:

Database commits ensure the data are saved to disk, while the transaction processing is underway or complete. Rollback ensures that the already completed processing is reversed back, and the data already processed are not saved to the disk in the event of the failure of the completion of the transaction processing. All other options do not ensure integrity while processing is underway.

NEW QUESTION: 4
